How to Draw Your Character with AI

Three steps to draw your character with the AI drawing generator.

1

Describe your character

Type who they are — face, hair, outfit, weapon, and the pose or mood you want. The more specific your prompt, the closer the drawing.

2

Pick a drawing style

Add the look you're after — ink linework, watercolor, chibi, storybook — so the result reads as a real drawing, not a photo.

3

Generate and re-prompt

Select Generate to render your character, then adjust the wording and generate again until the illustration matches the one in your head.
